

Interested in using Digital Inclusion to bring generations together?

The Digital Age Project is an initiative that focuses on the promotion of digital and social inclusion for older people.

With continued funding from the Big Lottery Fund NI we are taking a new approach to our Digital Age Project linking up post-primary schools and older members of the community.

Come along to our information session and find out more about how your organisation can use technology to link generations in your local area using our free downloadable Digital Age Project Toolkit

www.digital-age.org.uk

Tuesday 28th February 2017
