SHORT COURSE TRAINING OPPORTUNITIES

The School of Medicine, Dentistry and Biomedical Sciences, Queen's University Belfast have developed three short courses in collaboration with Queen's Graduate School for healthcare professionals working in a primary care setting. These courses will help applicants build on their strategic management and leadership skills required to enhance their career.

STRATEGIC MANAGEMENT AND LEADERSHIP IN PRIMARY CARE (40 CATS)

The Strategic Management and Leadership module offers skills enhancement and formal accreditation of leadership and management skills to primary care practitioners at postgraduate level. The module consists of two units - Strategic Leadership and Strategic Management Project. The module is also accredited through the Chartered Management Institute (CMI) for a Level 7 Certificate.

COACHING SKILLS FOR LEADERS (20 CATS)

The Coaching module provides participants with an understanding of the benefits, types and application of coaching used by strategic leaders and introduces coaching tools, techniques and approaches. It also gives participants the opportunity to practice and enhance their coaching skills.

SOCIAL MODEL FOR HEALTH AND WELLBEING IN PRIMARY AND COMMUNITY CARE (20 CATS)

This short course will provide students with a knowledge of the Social Model of Health, as a driver for change in health and social care including the introduction of community-based services such as Social Prescribing. Students will learn about community-based solutions for health and wellbeing and the reduction of health inequalities. Students will learn how to evaluate health services, and will develop skills in low-intensity interventions, including Brief Motivational Interviewing.

These short courses can be taken on a stand-alone basis, or combined (60 CATS) to obtain a Certificate in Professional Development for Primary Health Care.

WHO ARE THESE SHORT COURSES DESIGNED FOR?

These short courses are designed for those who want to:

- Build on their strategic management and leadership skills
- Focus on translating and implementing organisational strategy into effective operational performance
- Access cutting edge project management and leadership thinking and knowledge
- Learn coaching skills and techniques as part of their leadership toolkit
- Learn about social prescribing and its role in community-based healthcare
